

# CT-3

## Payment machine

### CT-3

CT-3 is a payment terminal for all-mounted or stand-alone mounting.

Pay quickly and easily with bankcards or private loyalty card.

Card dispensing: Customer can buy loyalty card with any amount. Later, a customer may reload more value to the loyalty card.

CT-3 has many options to communicate with, for instance, wash machines and self-service machines.

The 19" touch display, is divided into 3 parts, which give the customer a good overview what has been chosen, with clear product choice menu, information menu and purchase cart.

Printer: receipt of purchased purchase, an option is a ticket/barcode printer.

The machine may use a Central database (SQL) in order to connect many plants to use same loyalty cards. With a "back office" program, the plan owner can work with invoice customers and analysis of sales statistics anywhere via a homepage.

The machine is basically design with 3 modules (lower part), which can be altered due to customer's specifications.
